

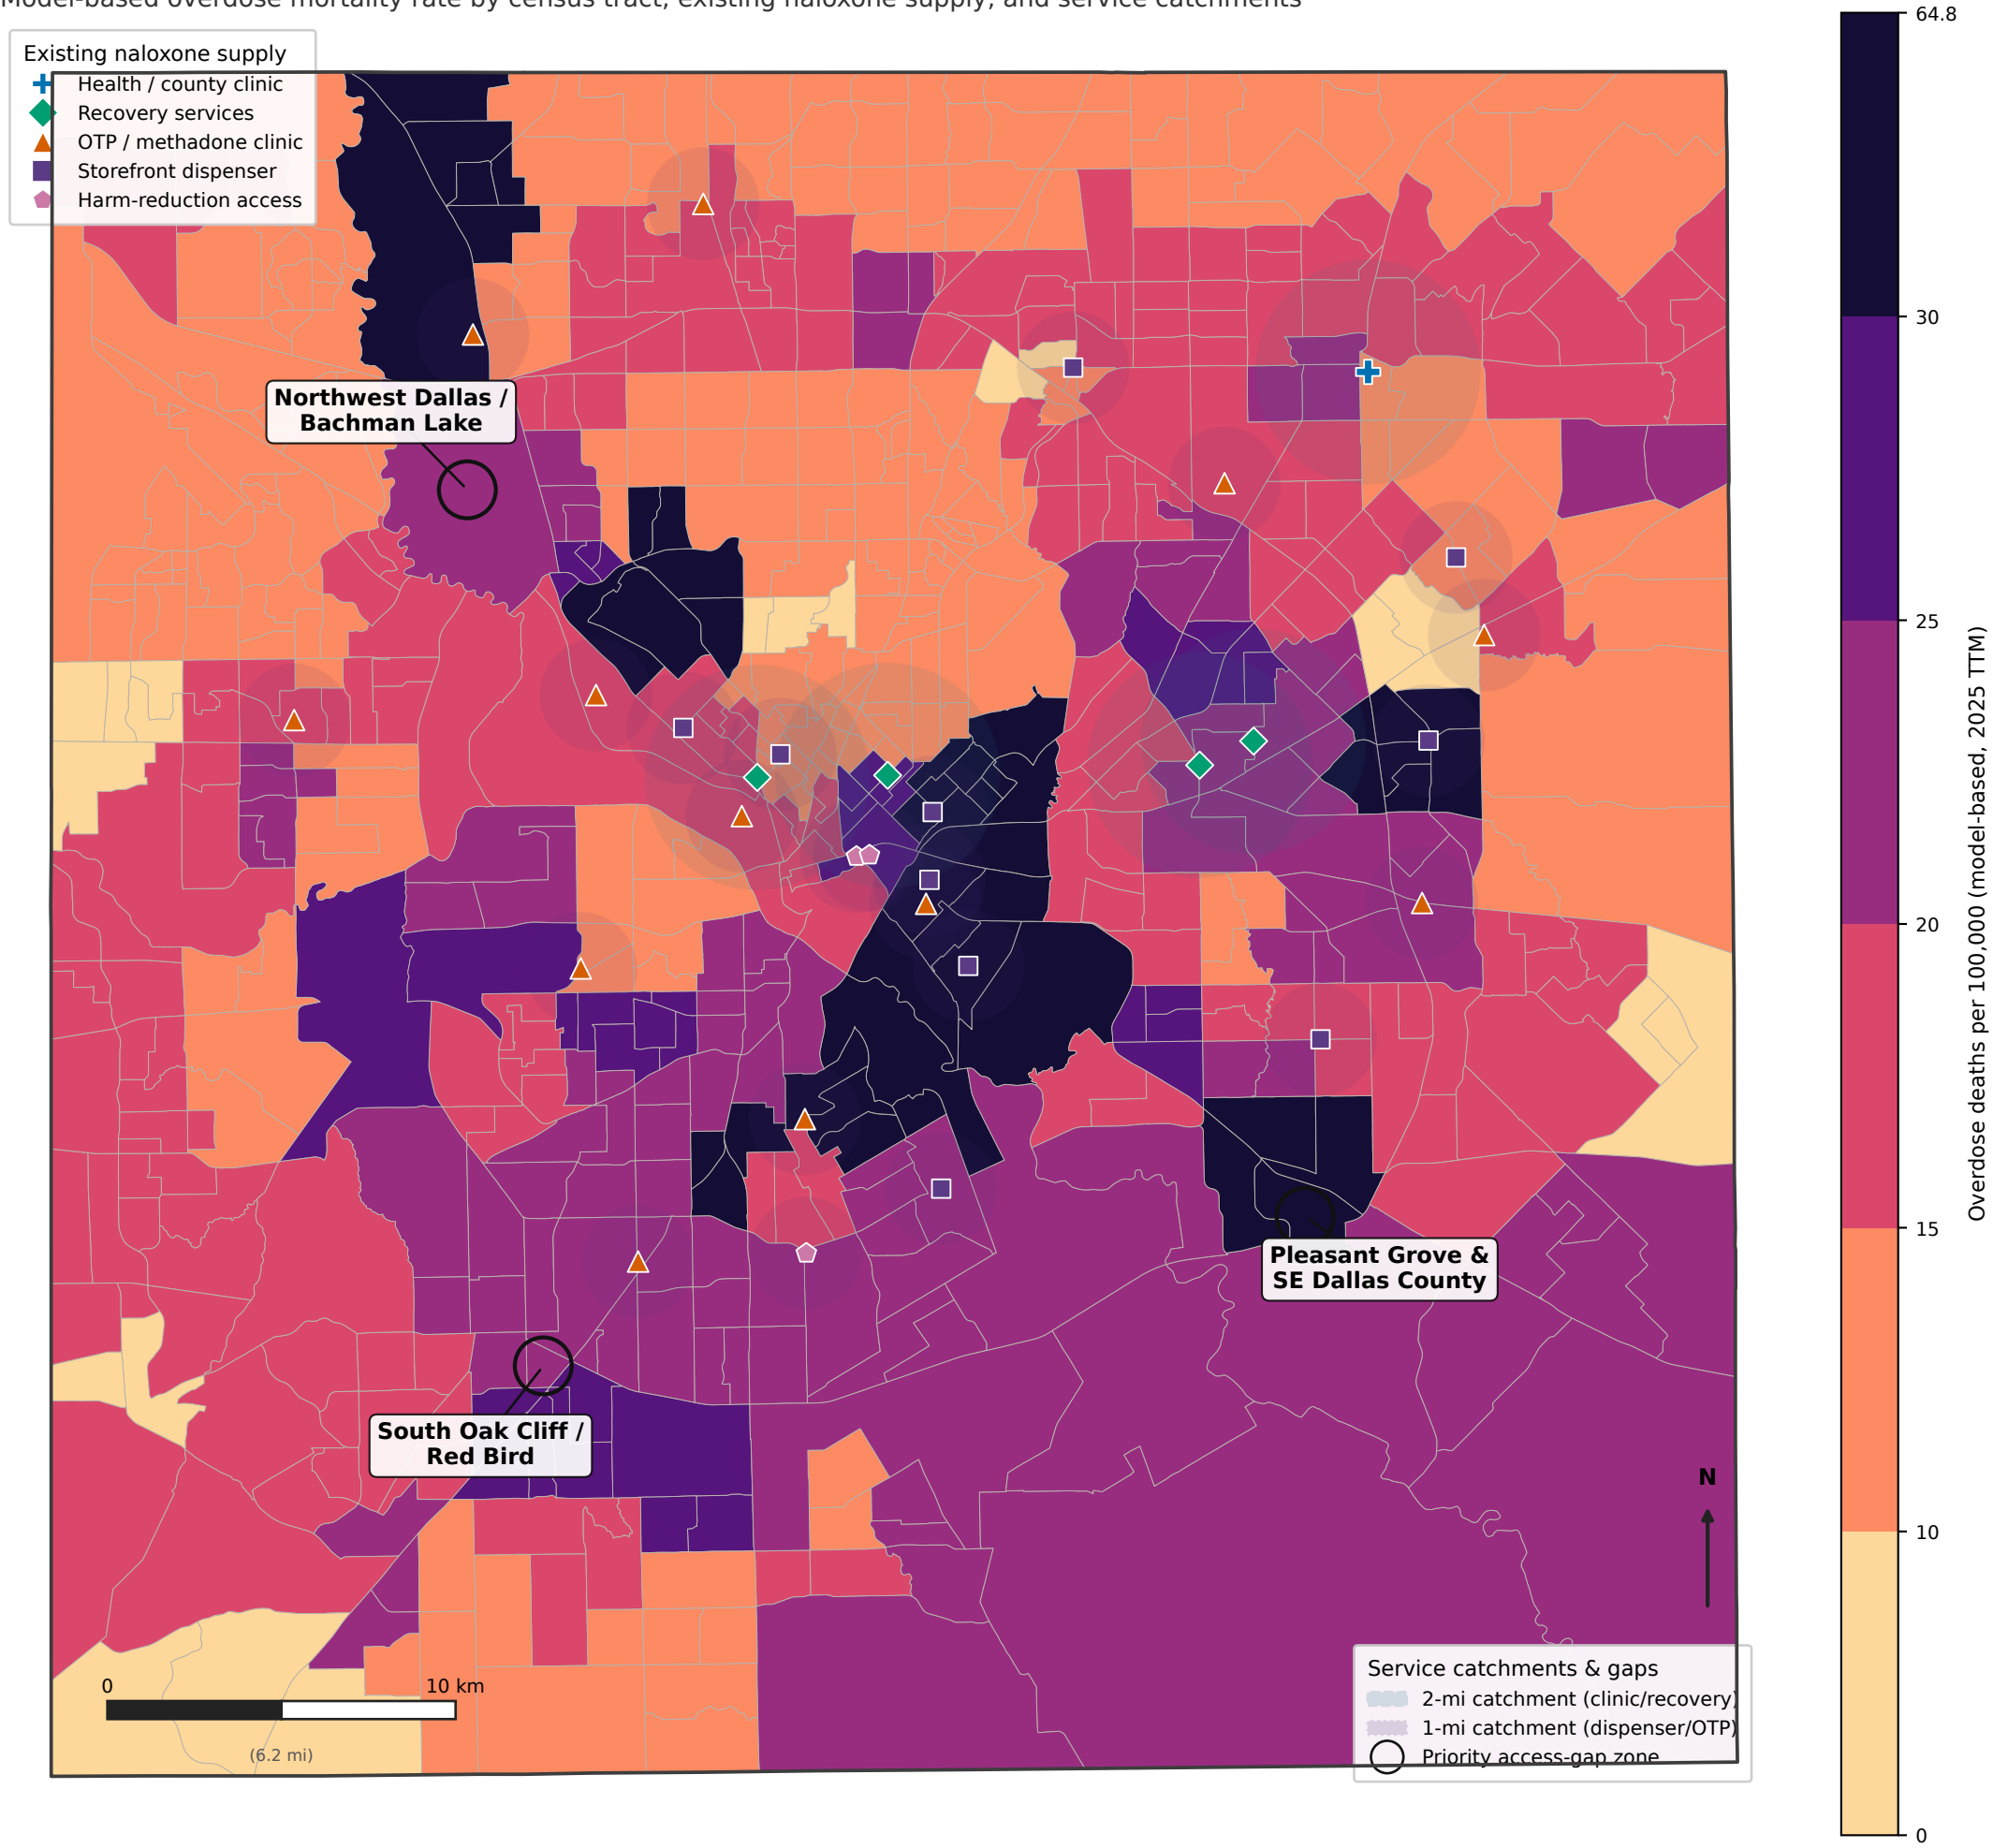

Figure 1. The naloxone access gap in Dallas County

Model-based overdose mortality rate by census tract, existing naloxone supply, and service catchments

Sources: CDC NCHS census-tract overdose death rates (4day-mt2f TTM 2025, data as of 2026-07) | TX DSHS NarcanSites (Apr 2026) | SAMHSA findtreatment.gov (Jul 2026) | ACS 2020-2024 5-yr | CDC/ATSDR SVI 2022 | TABC (Jul 2026) | Dallas County Open Data (Jul 2026) | OpenStreetMap (Jul 2026). Tract boundaries: Census TIGER 2024. Projection: NAD83 / Texas North Central (EPSG:32138). CDC suppresses tract death counts of 1-9; 592 of 645 tracts (91.8%) carry suppressed counts. Model-based rates (4day-mt2f) are shown for all tracts; tract-level values should be read as smoothed estimates, not exact counts.
